

We consider an FSM with '0' as the initial state, the input set = $\{a,b\}$  and output set= $\{x,y\}$ .

Using the W strategy, write a test sequence for the transition  $(3,a/y,0)$ .

We consider an FSM with '0' as the initial state, the input set = $\{a,b,c\}$  and output set= $\{x,y\}$ .

Using the (P)UIO strategy, write a test sequence for the transition  $(3,a/y,0)$ .
